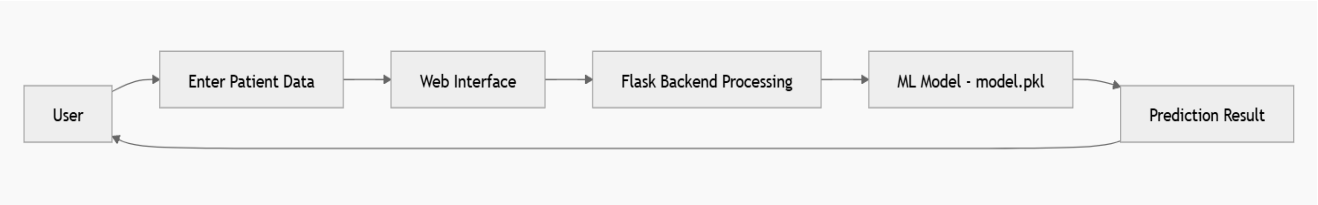
Project Design Phase II
Data Flow Diagram & User Stories

Date	8 March 2026
Team ID	699d5fa0c40b5ad0e9ee5a7d
Project Name	Predictive Pulse: Harnessing Machine Learning for Blood Pressure Analysis
Maximum Marks	4 Marks

Components in your system

- User (Doctor / Patient)
- Web Interface
- Flask Backend
- Machine Learning Model
- Prediction Result



User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story	Acceptance Criteria	Priority	Release
User (Patient/Doctor)	Enter Patient Data	USN-1	As a user, I can enter patient health parameters in the system	The system accepts valid health data inputs	High	Sprint-1
User	Data Processing	USN-2	As a user, I want the system to process my health data	System processes input data correctly	High	Sprint-1
User	Prediction	USN-3	As a user, I want the system to predict blood	The system generates	High	Sprint-2

			pressure stage	prediction results		
User	Result Display	USN-4	As a user, I want to view the prediction result	Prediction result is displayed clearly	High	Sprint-2
Administrator	Model Management	USN-5	As an admin, I want to update the ML model if required	System allows model update	Medium	Sprint-3
